DETAILED ACTION

Claim Objections

Claims 3, 7, 8 are objected to because of the following informalities:

Claim 3 recites the limitation "said accommodation portion" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7 and 8 recite "the sinking –amount adjustment section is a convex seat portion".

It can be interpreted that the sinking –amount adjustment section includes only one convex seat portion. However, the specification suggests a plurality of the seats corresponding to a plurality of the bumps.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 3, 5, 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Ikea et al.

Application/Control Number: 10/614,196

Art Unit: 2833

With regard to claim 1, Ikea et al (US 6,439,897) disclose a socket for a semiconductor device comprising:

a contact sheet (14) having a plurality of bumps (14a) to be electrically connected to a terminal group (2a) of a semiconductor device (2), a pressing member (30)

an accommodation portion (13) for accommodating the semiconductor device disposed on said contact sheet, and a movement-amount controlling member (15).

With regard to claims 2 and 3, lkea et al disclose socket for a semlconductor device comprlsing:

a contact sheet (14) having a plurality of bumps (14a) to be electrically connected to a terminal group (2a) of a semiconductor device (2),

a pressing member (30) being formed integral with a contact sheet pressing member (30a); an accommodation portion (13) for accommodating the semiconductor device disposed on said contact sheet.

a contact sheet (14) having a plurality of bumps (14a) to be electrically connected to a terminal group (2a) of a semiconductor device (2), a pressing member (30) an accommodation portion (13) for accommodating the

semiconductor device disposed on said contact sheet,

With regard to claims 5, 9-11 Ikea et al disclose most of the limitations as applied to claim 1 above plus a sinking-amount adjustment section (12a, Fig. 4).

With regard to claims 9, 10, 12, Ikea et al disclose most of the limitations as applied to claim 1 above plus a sinking-amount adjustment section (15) made of elastic material.

2. Claims, 2, 4, 5, 6 are rejected under 35 U.S.C. 102(e) as being anticipated by the admitted prior art.

The admitted prior art (Fig. 20) discloses a contact sheet (6) having a plurality of bumps (6b) to be

electrically connected to a terminal group of a semiconductor device (12),

a pressing member (16) being formed integral with a contact sheet pressing member; an accommodation portion (2a) for accommodating the semiconductor device disposed on said contact sheet.

The admitted prior art also discloses a sinking-amount adjustment section (a depression in the base for an elastic sheet (4), which restricts the sinking.

Allowable Subject Matter

Claims 7 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

No prior art has been found to anticipate or render obvious the presently claimed subject matter. Specifically, none of the prior art of record discloses the combination of the limitations presented including the using a plurality of the seats corresponding to a plurality of the bumps to prevent the extensive sinking the contact sheet at a location of the bumps.

Any inquiry concerning this communication should be directed to Alexander Gilman at telephone number (571) 272-2004. The examiner can normally be reached on Monday-Friday, 10:30 a.m. - 8:00 p.m.
